ADDGAME DDR5 | Spider X5 RGB Sync Ready

The AddGame Spider X5 DDR5 RGB combines advanced technology with striking RGB aesthetics. Its lighting seamlessly synchronizes with major motherboard RGB software. The memory overclocks up to 7200MHz and has an improved heat spreader for better dissipation. The Spider X5 supports XMP 3.0 and the EXPO overclocking feature, and is compatible with both Intel and AMD DDR5 platforms, making it a top choice for gamers seeking RGB enhancement.

	SPIDER X5 (Intel/AMD)	SPIDER X5 (Intel)
Module Type	DDR5 UDIMM 288 Pin	
Speed (MT/s)**	4800, 5600, 6000, 6400	7000, 7200
Voltages	1.1V, 1.2V, 1.3V	1.4V, 1.45V
Overclock Feature	XMP 3.0, EXPO	XMP 3.0
Compatible Platform	AMD 600 (Ryzen 7000 CPUs) Intel 600 (12th Gen Core CPUs) Intel 700 (13th Gen Core CPUs)	Intel 700 (13th Gen Core CPUs)
Latency	C36, CL38, CL40	
Capacity	16GB, 32GB, 64GB	
Package	Single and Dual Cannel Kits	
Heatsink	Yes	
On-die ECC	Superior Aluminum heat spreader	
Dimensions	133.7 x 41 x 7.7 mm; 41mm Height	
Warranty	Limited Lifetime	

- Premium Aluminum Heat Spreader
- On-die ECC
Maintain Data Integrity

ADDGAME

addlink Gaming Series

Made in Taiwan

Note
 * This DDR5-4800 Memory kit cannot be overclocked using Intel XMP or AMD EXPO.
 ** To achieve the Advertising Speed, need to enable the XMP or EXPO profile in the BIOS
